

THE ALASKA LEGISLATURE

*** HONORING ***

*** PROFESSOR RICK STEINER ***

The Twenty-seventh Alaska State Legislature is proud to recognize Professor Rick Steiner for his many years of outstanding public service to the University of Alaska and for the exceptional impact his work has had in Alaska, in the nation and around the world.

Professor Steiner has had an extraordinary career with the university spanning almost 30 years. His record includes more than 120 publications, some of which have reached millions of readers (such as his piece on global warming published in USA Today in 2001), dozens of statewide television programs as a producer/host on natural resource issues, as well as several prestigious awards.

Professor Steiner's work toward a constructive resolution of the Exxon Valdez Oil Spill is legendary. In the wake of the spill, he was a leading voice for independent scientific analysis to determine damages and recovery strategies. Professor Steiner was also a strong proponent of public structures and processes to prevent future spills. More recently, he has been a key advisor on developing strategies to assess impacts and remedies to address the Deep Water Horizon disaster.

The United Kingdom's well-regarded Guardian newspaper described Professor Steiner as "one of the world's leading marine conservation scientists" as well as "one of the most respected and outspoken academics on the oil industry's environmental record."

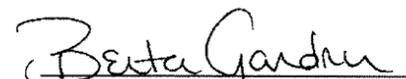

Professor Steiner's global conservation work has been exceptional, in particular his work on conservation issues in high-risk, conflict zones around the world including: working in the Colombian Amazon, during a revolutionary offensive, traveling on the Amazon (with a team of heavily armed guards) to assist indigenous tribes with biodiversity conservation; working on behalf of the government of Pakistan, at a very dangerous time, to establish and lead the first Natural Resource Damage Assessment program in a developing country; assisting Nigeria's Ministry of Environment to develop a program to mitigate 50 years of oil damages; and organizing an environmental damage assessment for the government of Lebanon after the massive eastern Mediterranean oil spill.

The Twenty-seventh Alaska State Legislature salutes Professor Rick Steiner for his many and significant contributions to independent scientific inquiry and for his strong commitment to promoting sound public policy decisions in Alaska and around the world.

MIKE CHENAULT
SPEAKER OF THE HOUSE

GARY STEVENS
PRESIDENT OF THE SENATE

REP. BERTA GARDNER
PRIME SPONSOR

Date: February 9, 2011
